

Calendar

monday tuesday wednesday thursday friday sunday

The door-to-door system collects residual waste, organic waste, and light packaging. Other waste is deposited in the designated containers at:

- Libertad Street
- Sant Ramon Square
- City hall

If you have any questions regarding the waste collection system, please contact the Benlloc Town Council through official channels.

Door-to-door waste collection system

How does it work?

At Benlloc, you can throw your trash at your doorstep, as we have a door-to-door waste collection system.

The goal: to recycle 60% of household waste by 2030.

To do this, between 10 p.m. and 12 p.m., you must take your trash out into the white bin in your home and leave it at the outside door, following the segregation calendar.

Please note that:

- 1 You must recycle your trash correctly and take out the correct amount according to the calendar each day, otherwise your waste will not be collected.
- 2 You should always take the white bin out onto the street, as it has a recognition system.
- 3 On organic waste collection days, you will need to use a compostable bag.
- 4 For waste that must be recycled at a recycling center, Benlloc has an ecopark and a mobile ecopark located in the city center on certain days each month.

On vacation we also recycle

Whether you live in Benlloc or are just visiting, the waste collection system works the same.

Together we can make Benlloc a more sustainable place. Properly recycling every bit of waste will allow us to meet Europe's circular economy goals and reduce pollution associated with waste incineration.
